

AEQUITAS

Security Software

Our solution identifies malicious activities and alerts security administrators to any suspicious events. It features a proprietary heuristics engine designed to detect previously unknown ransomware variants.

As a provider of security solutions, we deliver a variety of services designed to protect our clients' data and systems.

Aequitas Features Include:

- Detect, Respond, and Recover Controls: Ensuring system integrity and maintaining audit evidence
- *dvanced Heuristics and Behavioral Analysis
- Support for forensic logging and cyber-incident reporting
- Continuous monitoring with anomaly detection capabilities
